CLINICAL QUALITY (LS VS SS)

STAFF RETENTION & TURNOVER %

EXECUTIVE ACTION PLAN & TARGETED IMPROVEMENTS

PRIMARY RISK AREAS (ACTION REQUIRED)

- Health Inspections:** Review top citations from the 2025-12-05 survey. Conduct immediate mock surveys focusing on Physical Plant and Infection Control vulnerabilities.
- Clinical Triggers:** Monitor high-risk litigation triggers (Readmissions: 23.1%, Falls: 3.7%). Ensure clinical protocols and MDS assessments match actual resident acuity.

STABILIZATION STRATEGY

- Staffing Optimization:** RN hours currently sit at 0.51 PPD. Shift hiring focus toward weekend RN coverage to elevate the Staffing Star Rating above the State Average.
- Acuity Capture:** Current Case-Mix Index is 1.57. Audit documentation practices to ensure staffing hours are accurately risk-adjusted by CMS based on actual patient loads.
